

## Wessex Water, in the UK, orders an integrated SLG® + Flosep solution

***Voisins-le-Bretonneux, 25 June 2018, 8am – Orege announces the sale of an integrated mobile SLG® + Flosep solution to Wessex Water for a total value of around £200,000. This solution will be delivered during the summer.***

Following a successful demonstration during the first quarter of 2018, Wessex Water has now ordered a first mobile SLG® + Flosep unit for conditioning and thickening liquid sludge.

*"Investment in innovation is embedded in Wessex Water's business planning. The main challenge successfully addressed by Orege and its SLG® solution has made it possible to drastically reduce transportation costs while maintaining effluent compliance," said Wessex Water. "Liquid sludge transportation from Wessex Water's satellite water recycling centres to a sludge treatment centres is a major operational cost," it continued.*

The compact mobile solution from Orege, deployed on a trailer weighing less than 3.5 tons, will be able to serve several wastewater treatment plants with a view to significantly reducing the volume of sludge transported and the related costs.

With a value of £200,000, this first order from Wessex Water represents an important step in the adoption of the SLG® technology by a leading water company in the UK.

### About Wessex Water

Wessex Water is a regional water and sewerage business serving 2.8 million customers across the south west of England including Dorset, Somerset, Bristol, most of Wiltshire and parts of Gloucestershire and Hampshire. The Bristol and Bath area in the north west has a population of around 750,000 and in the south east the Bournemouth and Poole area has about 300,000 residents.

### About SLG®

SLG® (solid, liquid, gas) is an innovative sludge conditioning and treatment technology. It offers a cost-effective and high-performance solution for industrial firms, operators and municipalities by significantly reducing sludge volume and promoting sludge recovery by changing its physical, chemical and rheological characteristics.

Fully aligned with new regulatory and environmental requirements, the patented SLG® technology has received several international awards, including 2016 Breakthrough Technology of the Year at the Global Water Intelligence Awards and Most Innovative Technology at Birmingham Utility Week in 2017.

### About Orege

Orege is an international cleantech firm specialized in the development, manufacturing and marketing of treatment

solutions for municipal and industrial sludge and complex effluents. With bases in France, the US and the UK, Orege supports its clients in a dozen countries around the world.

Orege has been listed on the regulated market Euronext - Paris since 5 July 2013
